DESENVOLVIMENTO DE SISTEMAS

## **Exemplo - TabControl**

### Códigos

```
□using System;
 1
      using System.Collections.Generic;
      using System.ComponentModel;
      using System.Data;
 4
      using System.Drawing;
      using System.Linq;
 6
      using System.Text;
      using System.Threading.Tasks;
      using System.Windows.Forms;
 9
10
11
     □namespace Win_TabControl
12
          public partial class FrmTabControl : Form
13
14
              public FrmTabControl()
15
16
                  InitializeComponent();
17
18
```

```
public void Limpar(Control con)
20
21
                   foreach (Control caixa in con.Controls) {
22
                       if (caixa is TextBox) {
23
                           ((TextBox)caixa).Clear();
24
25
                       else {
26
                           Limpar(caixa);
27
28
29
30
                   txtCodigo.Focus();
31
                   picFoto.Image = null;
32
33
```

```
private void btnFoto_Click(object sender, EventArgs e)
34
35
                   openFileDialog1.ShowDialog();
36
                   if (openFileDialog1.FileName != "")
37
38
                       picFoto.Load(openFileDialog1.FileName);
39
40
41
                   else
42
                       picFoto.Image = null;
43
44
45
```

```
private void btnLimpar_Click(object sender, EventArgs e)
46
48
                    this.Limpar(this);
                    dataGridView1.Rows.Clear();
50
                                       <u>A</u>dicionar
              private void btnAdicionar_Click(object sender, EventArgs e)
52
53
                  dataGridView1.Rows.Add(txtCodigo.Text, txtNome.Text, picFoto.Image);
                  this.Limpar(this);
55
56
```

```
private void btnInserir_Click(object sender, EventArgs e)
58
59
                  dataGridView1.Rows.Insert(0, txtCodigo.Text, txtNome.Text, picFoto.Image);
60
                  this.Limpar(this);
61
62
               private void btnSair_Click(object sender, EventArgs e)
64
65
66
                   Application.Exit();
67
68
```

```
private void btnElimina Click(object sender, EventArgs e)
70
71
72
                  int linha = dataGridView1.Rows.GetRowCount(DataGridViewElementStates.Selected);
73
                  int reg = dataGridView1.RowCount;
                  if (linha == 0)
74
75
                      MessageBox.Show("A T E N Ç Ã O Selecione um item para excluir !!",
76
                                       "*** EXCLUIR ITEM ***",
77
78
                                       MessageBoxButtons.OK,
                                       MessageBoxIcon.Asterisk);
79
80
                  else if (reg != 0)
81
82
                       dataGridView1.Rows.RemoveAt(dataGridView1.CurrentRow.Cells[0].RowIndex);
83
84
85
```

#### Código da tecla <ENTER>

```
86
               private void txtCodigo_KeyPress(object sender, KeyPressEventArgs e)
 87
 88
                    if (e.KeyChar == 13)
 89
 90
                        txtNome.Focus();
91
92
93
 94
95
                private void txtNome_KeyPress(object sender, KeyPressEventArgs e)
96
                    if (e.KeyChar == 13)
97
98
                        btnFoto.Focus();
99
100
101
102
103
```
